

Discover First

GreenStar Technologies X LA Lounge

Your smart lighting journey begins with a consultation at our fully immersive Home & Lifestyle Experience Centre in Glen Huntly VIC. Discover all that Circadian Lighting has to offer in-person with a demo, there you'll learn and experience our extensive range of lighting products and systems first-hand.

It's all begins with a chat where we walk you through our Showroom stocked with innovative products and the best lighting systems available on the market. The primary goal of the discovery phase is to fully understand your visions and aspirations for your home, as well as identifying other potential solutions through the use of home automation.

To ensure your lighting project goes as smoothly as possible, we recommend booking a consultation at our Home & Lifestyle Experience Centre (located in Glen Huntly VIC), there we'll make the introduction to our partners over at La Lounge, who are Award-Winning Lighting Architects. La Lounge have over 15+ years of experience supplying superior lighting design schemes for residential and luxury projects. They understand the science and art behind lighting and can source any fixture required to enhance the look of your space. With this introduction they'll design a bespoke lighting system exclusively for you and your home.

Lighting Architects

Established in 2009 by Glenn and Susan Stokes, LA Lounge specialises in highend lighting design and DALI lighting control. LA Lounge was formed to combine a passion for the technical and a flair for the creative aspects of architectural lighting. As one of the first Australian companies to introduce DALI lighting control to the residential market, the LA Lounge team's expertise is sought after by a broad spectrum of design professionals on projects in Australia, New Zealand, the UK and Europe.

The team at La Lounge offers clients a sustainable, energy-efficient and personalised lighting solution like no other. Their Australian designed luminaires and lighting range compliment any architectural designed home. With 15+ years of experience, their team of Lighting Professionals have produced bespoke premium design outcomes for homeowners in Australia and Europe. With Cutting edge innovation and solutions which include DALI and Circadian Rhythm Lighting, they're able to personalise indoor and outdoor living environments through integration of all the services clients rely upon and according to clients lifestyle with total simplicity – all beautifully incorporated into the interior and exterior design.

LA Lounge clients include leading interior designers and architects, award winning builders and automation companies as well as homeowners seeking to create their own stunning dream homes.

Lighting Architects & Engineers

Established in 2009, our lighting partners - LA Lounge is a lighting design & supply company that specialises in high-end lighting design & DALI lighting control in Residential, Multi-Res & Commercial projects. LA Lounge is in the business of creating atmosphere and warmth through the magic of architectural lighting. Offering lighting, automation and electrical design. LA Lounge is passionate about merging the art and science of lighting, transforming a 2-dimensional plan into the 3-dimensional world. Easy to install & compatible with all home automation & dimming systems - making it a go to for trades, designers & architects.

LA Lounge has been established for over 15 years and focuses on technical aspects of creative architectural lighting. They are one of the first Australian companies that introduced DALI lighting (Circadian / Human Centric Lighting) control in residential projects. LA Lounge is based in Sydney, with projects located all across Australia and Europe. LA Lounge has a well-established range of architectural and decorative lighting. Including our Confidential in-set plaster range.

In collaboration with our team at GreenStar Technologies, La Lounge has a team of Lighting Architects that are ready to help design a bespoke lighting system for you and your home. We'll be here to help you throughout the process and liaise with all relevant parties throughout the build. We have expertises in the electrical contracting and home automation area, while the team at LA Lounge focuses on lighting engineering and design.

Our Process

Phase 1 – Lighting Discovery

To create a partnership, this initial consultation is all about learning and developing trust. Your smart lighting journey begins with a consultation at our fully immersive Home & Lifestyle Experience Centre in Glen Huntly VIC. Discover all that Circadian Lighting has to offer in-person with a demo, there you'll learn and experience our extensive range of lighting products and systems first-hand.

There we'll make the introduction to our partners over at La Lounge, who are Award-Winning Lighting Architects & Engineers. With this introduction they'll design a bespoke lighting system exclusively for you and your home. During this phase the Lighting Architects at La Lounge can assist you with any necessary changes to ensure that any opportunity to enhance the lighting system are captured and incorporated to achieve the best possible outcome for your project.

Phase 2 – Review Plans

After you're satisfied with the suggested lighting solutions for your build from the team at La Lounge, we recommend booking another consultation at our Home & Lifestyle Experience Centre. Our Technology Designers will provide advice and creative insights, all while reviewing your lighting plan from La Lounge. Our team will then price up a 'Scope Of Work' for your bespoke lighting system. (Refer to GreenStar Technologies Process for more information / www.greenstartech.com.au)

The primary goal of this phase is to fully understand your visions and aspirations for the entire build, as well as identifying any potential solutions for your home through the use of Home Automation Technology. Together, we'll discover personalised solutions that are important specifically to your lifestyle. By workshoping this concept early on, you may be able to avoid disrupting the process of your build or renovation that come from late planning.

Phase 3 – Supply & Delivery

The Supply & Delivery Phase is all about the build! Lighting supply can be complex if it's not planned and understood properly. As a whole-home solution, our team will supply all the lighting as per the proposal from La Lounge for your electrical contractor on site.

Once you have signed off and accepted the final Scope Of Work, our team of certified technicians will install your home automation / lighting systems on site and will be here from start to finish and beyond. We'll be there every step of the way to ensure the entire project runs smoothly, within the budget and on time. Our project management team will meticulously run behind the scenes and map the entire Scope Of Work with your project team.
